

STOP, READ LABEL BEFORE USING PRODUCT!

FORTEK  is a nutritional complex and biostimulant with anti-stress properties. It is formulated in liquid solution, rapidly absorbed and acts by activating and regulating plant metabolism.

FORTEK  has been developed as a foliar treatment and can be used through the irrigation systems. It is particularly useful in shock treatments on plants with great deal of stress or those which have suffered damage by drought, freezing, hurricanes, transport, transport, pruning cuts, etc.

FORTEK  is recommended to restore plant health following adverse growth conditions.

FORTEK  stimulates root growth and improves fruits set as well as fruit color, reduces flower abortion and increases fruit set on a variety of crops.

FORTEK  has been specially designed to rapidly recover plant health when they are under stress conditions. It is quickly absorbed by cell plants, stimulates and regulates metabolic functions such as optimum nutrient uptake. Fortek promotes crop growth and vigor.

DIRECTIONS FOR USE

It is a violation of the Federal law to use this product in a manner inconsistent with this label. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to State or territory, consult the agency responsible for pesticide regulation.

PRECAUTIONS AND WARNING OF USE:

Although **FORTEK**  is not a toxic product, it is recommended to follow the instructions on the label. Use suitable protective equipment: mask, gloves, coveralls, eyewear, boots and cap. No smoking, eating or drinking while driving or handling this product. When finished clean all equipment and protective clothing before using again.

USE SAFETY RECOMMENDATIONS

Users should: Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Use should remove clothing immediately if pesticide gets inside.

PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers must wear: long sleeved shirts and long pants, waterproof gloves and shoes plus socks and protective eyewear. Discard clothing and other absorbent materials that have been drenched or contaminated with this product.

Follow manufacturer's instructions for cleaning/maintaining personal protective equipment. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

PHYSICIANS INFORMATION: **FORTEK**  contains nitrogen, phosphorus, potassium and elements of organic origin. It also includes humic and fulvic acid, auxins, gibberellic acid and cytokinins.

ENVIRONMENTAL HAZARDS

Avoid spills in ditches, ponds and waterways. The product is not toxic to fish, bees, birds and livestock. In case of spills, to absorb the product you may use sawdust, sand or any type of oil type absorbent. Dispose of empty containers according to Federal and local regulations.

STORAGE AND TRANSPORT:

Store in a cool, dry, well-ventilated area. Do not store or transport near food, seeds, plants and clothing. Store in a safe and well-ill environment.

Manufacturing Date: 12-15-08

Expiration Date: 12-15-11

USE RECOMMENDATIONS

CROPS	RATES (0.2-100 gal)	APPLICATION TIMING
Golf Courses	6-8 or 1000 sq ft	Apply twice a month to begin color and growth during growing period.
Turf and Ornamentals	12-16	Apply twice a month to begin color and growth during growing period.
VEGETABLES - DIRECT SEEDING	12-16	Start applications 15 days after germination. Second application at flower bud formation stage. Repeat sprays 2 weeks after.
TOMATOES, PEPPERS	12-16	Start applications 15 days after germination. Second application at flower bud formation stage. Repeat sprays 2 weeks after.
POTATOES, ONIONS	12-16	Apply 2 weeks after bud break, follow at flower bud formation and a third application 2 weeks later.
BEANS, PEAS SOYBEANS, PEANUTS SWEET CORN	12-16	Apply at 3rd 4th leaf stage, repeat SOYBEANS, PEANUTS applications 2 weeks later or at full bloom.
RICE, CORN, SUGAR CANE, SORGHUM	12-16	Start applications at 4th 6th leaf stage. Repeat application at maximum tillering stage.
TREE CROPS AVOCADO/CITRUS	12-16	Start application at first flush. Repeat at flowering.

RECOMMENDED USES

FORTEK  can be used on all stages of application systems such as ac drip irrigation, fertigation, flood irrigation and deep soil root injection at a rate of 24 - 36 Ounces per Acre. Can be used with small backpack sprayers @ a rate of 2 Ounce per 3 gallons of water.

METHODS TO PREPARE AND APPLY PRODUCT:

Fill the application tank 3/4 of its capacity, agitate product, triple rinse container and deposit its contents into equipment tank used for application. Mix until calibrated pressure and speed for proper application. Make sure there is constant agitation while applying product. Apply product to cultures as needed. Avoid applying more than label recommends. Make sure that the right equipment is used for the right application.

COMPATIBILITY:

FORTEK  can be used with all types of liquid fertilizers, Soil penetrants, Insecticides, Fungicides and Herbicides. It is recommended that you read label on all products used with **FORTEK** . It is important to read the analysis and percentages of product when using other types of liquid fertilizers to avoid an over application of nutrients or ingredients stated in this product. Please ask for technical support if you have questions in regards to compatibility.
