

Best-K[®]

GENERAL CHARACTERISTICS

Best[®] - K is a foliar double action Phosphonate fertilizer containing Phosphorus and Potassium. Besides being a rich source in the prior nutrients, due to its Phosphorus in the form of Phosphite ion, Best[®] - K is effective to strengthen and stimulate the natural mechanism of self defense from the treated plants, particularly in the stem, leaves and roots in fruit trees, vegetables and ornamentals. Best[®] - K provides a greater nutritional, immunologic and stimulant effect by its double systemic: ascendant and descendent. Best[®] - K is very important to counteract the excesses of Nitrogen, to stimulate root growth and to promote earlier production. It is also important to provide consistent fruit formation during the ripening process.

PRECAUTIONS AND WARNINGS FOR USE :

DO NOT STORE THIS PRODUCT IN THE HOUSE, KEEP IN LOCKED AREA AND OUT OF THE REACH OF CHILDREN AND PETS.

USE THE FOLLOWING PROTECTIVE EQUIPMENT WHEN USING THIS PRODUCT: BOOTS, MASKS, GOGGLES, AND GLOVES.

DO NOT EAT, SMOKE OR DRINK WHILE HANDLING AND APPLYING THIS PRODUCT. BATHE AND CHANGE CLOTHING AFTER USE.

IN THE EVENT OF POISONING, SEEK MEDICAL TREATMENT AND PROVIDE THIS LABEL OR PAMPHLET. ALWAYS USE Best[®] - K IN OPEN, WELL VENTILATED AREAS.

SYMPTOMS OF POISONING:

Skin irritation may occur in very severe cases.

CONTACT WITH SKIN: Remove all clothing and wash affected area with generous amounts of soap and water. Apply petroleum jelly. Should symptoms persist., consult a doctor and provide this label.

INHALATION: move patient to a well-ventilated area. Loosen clothing and monitor breathing.

CONTACT WITH EYES: flush affected area for 15 minutes with clean water.

NEVER ADMINISTER LIQUIDS NOR INDUCE VOMITING WHEN TREATING UNCONSCIOUS PERSONS.

MEDICAL TREATMENT:

FOLLOW PRESCRIBED TREATMENT FOR SYMPTOMS.

CONSULT PROFESSIONAL IN AGRICULTURAL SCIENCES BEFORE BUYING AND USING THIS PRODUCT. PROTECT THE ENVIRONMENT BY OBSERVING GOOD AGRICULTURAL PRACTICES.

FOLLOW THE RECOMMENDATIONS PROVIDED IN THE PAMPHLET.

NON - TOXIC FOR FISH AND CRUSTACEANS.

IMPORTANT NOTICE

The Seller warrants that this product conforms to its chemical description as stated on the label. The product is reasonably fit for the purpose stated on the label when used in accordance with the label directions and instructions under normal conditions of use. Neither this warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions or under conditions not reasonably foreseeable to the seller. Buyer assumes the risk of any such use.

FOLIAR PHOSPHONATE FERTILIZER IN SOLUTION PK

Guaranteed Analysis

F1442

Chemical Composition:% w/w
 Available Phosphate (P205)30.00 %
 Potassium Oxide (K2O)20.00 %
 Inerts50.00 %
 TOTAL100.00 %

Contains: 500 grams active ingredient per kilogram

Net Content : 2.5 Gallon

PRECAUTION

EPA Establishment # 62171-MS-003

GENERAL USE RECOMMENDATIONS

Ensure proper calibration of application equipment prior to product use.

VERIFY SOIL AND WATER pH TO MAKE NECESSARY ADJUSTMENTS PRIOR TO DEFINING A FERTILIZER PROGRAM. CONDUCT A SOIL ANALYSIS TO DEFINE NUTRITIONAL NEEDS TO SUPPLEMENT.

It is necessary to perform a compatibility test if other products are to be tank mixed with Best[®] - K. User assumes full responsibility to ensure product compatibility. Best[®] - K can be applied through irrigation systems. The injection equipment used must be in compliance with Federal, State and local regulations. It is recommended to use Best[®] - K at the end of the irrigation cycle, ensuring that sufficient water run-off is allowed once the application is completed and prior to turning the system off.

WATER SOLUBLE FOLIAR FERTILIZER - READ INSTRUCTIONS BEFORE USE.

Shake well. Use higher rates at later stages

"KEEP OUT OF THE REACH OF CHILDREN AND PETS"

Adapt rates and water volume (50-100 Gallons/acre) according to crop development

CROPS	RATE	APPLICATION TIMING
VEGETABLES	1-2 qts./100 Gal.	Start applications in initial growth phase. Repeat sprays every 7-14 days, according to the use rate.
CUCURBITS (MELONS, WATERMELON, SQUASH, etc.)	1-2 qts./100 Gal.	Start applications at 4th-5th leaf stage for direct seeding and 4-7 days after transplant. Second application at first bloom. Third application at fruit set. Continue applying 7-14 days according to the use rate.
TOMATOES, PEPPERS	1-2 qts./100 Gal.	Start applications at 2nd-4th leaf stage for direct seeding and 4-7 days after transplant. Second application at first bloom. Third application at fruit set. Apply every 7-14 days according to the rate.
STRAWBERRY	1-2 qts./100 Gal.	Initiate applications 20 days after transplant. Repeat every 4-6 weeks, according to the use rate.
POTATOES, ONIONS	1-2 qts./100 Gal.	Start applications at planting on the row. Second application at tuber formation. Following applications at 7-14 days interval according to the use rate.
CITRUS	2-3qts./100 Gal.	Apply 4 times per year. Start applications after bud emergence. Use sufficient water volume to ensure plant coverage.
AVOCADOES	2-3qts./100 Gal.	Apply every four weeks up to four times per year.
BANANAS	2-3qts./100 Gal.	Apply every 2 weeks after mother plant harvest. Use sufficient water volume to ensure plant coverage.

DRENCH APPLICATION:

Vegetables: Use 7- 10 pints /100 gallons
Citrus and Avocadoes: Use 8 - 10 pints /100 gallons
 Use 3 - 4 applications per cycle. Use 4 - 5 applications per cycle.

FERTIRRIGATION: Use 5-10 pints /100 gallons

USE INSTRUCTIONS:

DO NOT MIX Best[®] - K with copper-based products nor with mineral oils.

Best[®] - K is NOT compatible with products such as Dimethoates, Dicolof, Oils and Nitrogen fertilizers.
